Important Notice to Dealers and Crane Operators

These weights are published by the manufacturer of the pool shell, Explore Industries Australia Pty Ltd atf Explore Industries Australia Unit Trust ("Explore Industries") and are approximate estimated empty pool shell weights only. They are provided solely as a guide for preliminary planning purposes and are not based on weighing each individual pool shell prior to dispatch.

The estimates are based on Explore Industries' manufacturing data and are generally accurate to within approximately $\pm 5\%$. However, as each pool shell is a hand-manufactured composite product, individual shell weights may vary outside that tolerance. No allowance has been made for lifting equipment, rigging or any other loads associated with the lifting operation.

This document does not constitute engineering, lifting or crane selection advice. Dealers are responsible for providing all relevant information to their crane contractor. The crane contractor is solely responsible for determining the appropriate crane capacity, lifting equipment and lifting methodology, having regard to the actual lift, lifting radius, site conditions and all other relevant circumstances.

Explore Industries provides this information in good faith as a guide only. Use of this guide constitutes acknowledgement that responsibility for lift planning, crane selection and the safe execution of the lift rests solely with the Dealer and the crane operator.

To the maximum extent permitted by law, Explore Industries excludes all liability for any loss, damage, injury, cost or expense arising from or in connection with the use of, or reliance on, this information.
